**SMART INDIA
HACKATHON
2026**

Problem Statement: Smart Campus Printing & Document Service

Team Name: Debug Thugs

Leader Name: Bhuvan Rai (+91 9741170406)

Description: DocPrint is a smart digital printing platform that connects students with nearby printing shops for seamless document upload, customization, ordering, and delivery. It reduces queues and delays through real-time tracking, QR pickup, printer monitoring, and intelligent order rerouting.

1. Printing Shop Registration & Service Marketplace

Shop Owner Registration

Printing shops and document service providers can **create an account and join the DocPrint platform**.

They can list their shop, making it easier for students to **discover, compare, and choose** the best printing center based on **location, price, speed, and service quality**.

Service Listing

Each printing center can clearly specify the services they provide, such as:

Black & White • Color Printing • Lamination • Photo Printing • Large-Format Printing • 3D Printing

Key Benefits

-  Creates a centralized printing ecosystem
-  Shows users only shops capable of fulfilling their requirements
-  Helps local printing businesses reach more customers
-  Encourages competition through better pricing, speed, and service quality

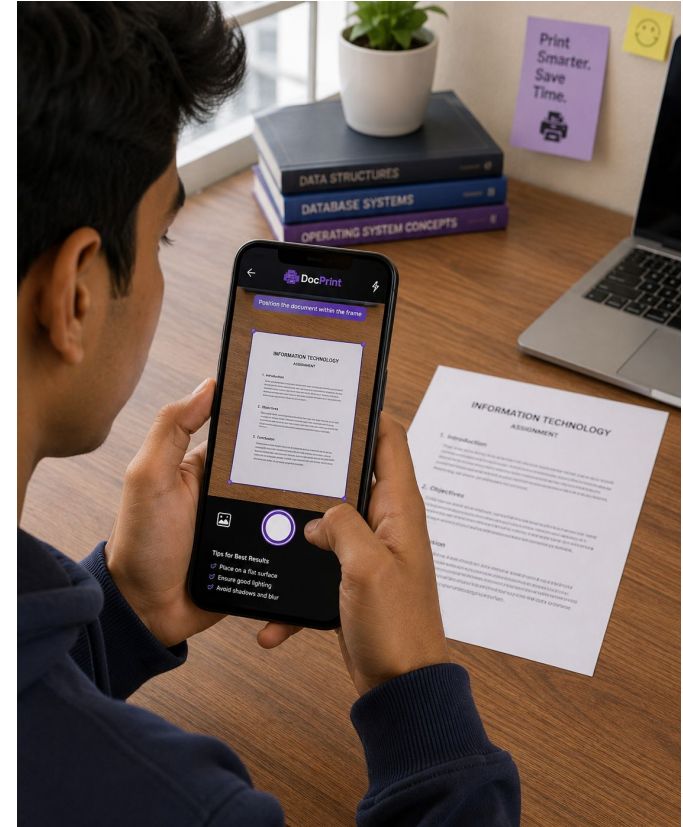

2. Users upload document in App

Users can configure:

- Number of copies
- Page range
- Desired delivery time
- Color or black & white
- Single or double-sided printing
- Paper size
- Binding options

Benefit

Students no longer need to stand in a queue simply to submit a document.

3. Automatic Document Generation

Generate Documents Directly by discussing with AI.

or

The platform can provide document templates for common student requirements.

Examples:

- Leave application
- Assignment cover page
- Project report cover page
- Bonafide request
- Internship letters
- Certificates
- Formal letters

Users just need to fill in required information, and the system automatically generates the document.

4. Document Editing Before Printing

Edit Documents Without Leaving the Platform

Users can make basic modifications before printing.

Possible features:

- Edit text
- Add images
- Change formatting
- Add signatures
- Merge documents
- Split documents
- Reorder pages

This reduces the need to use multiple applications before printing.

5. Smart Document Upload & Automatic Generation

Upload & Customize Documents

Users can upload documents directly through the **DocPrint app** and configure:

Copies • Page Range • Delivery Time • Color/B&W • Single/Double-Sided • Paper Size • Binding Options

Benefit: Students can submit printing requests digitally without standing in a queue.

Automatic Document Generation

DocPrint also provides templates for commonly required student documents, such as:

Leave Applications • Assignment Cover Pages • Project Report Covers • Bonafide Requests • Internship Letters • Certificates • Formal Letters

Users simply **fill in the required details**, and the platform automatically generates a ready-to-use document.

Result: Create + Customize + Print — All in One App

6. Reusable Student Document Library

Frequently Used Campus Documents

The platform provides a library of reusable templates and commonly required documents.

Examples include:

- Resume templates
- Assignment formats
- Lab record formats
- Project report templates
- College application forms
- Cover pages

Students can select a template, customize it, and directly send it for printing.

Benefits

- Saves time
- Maintains standardized formats
- Reduces repetitive work

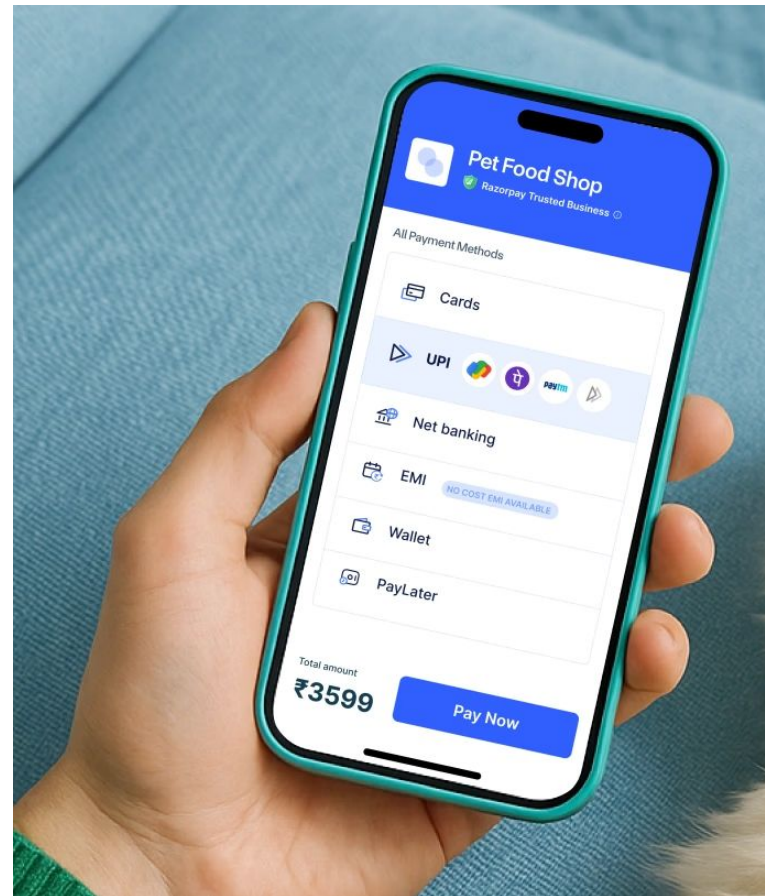

7. Secure Digital Payments

Razorpay & UPI Integration

The platform integrates digital payment systems such as **Razorpay and UPI**.

Users can:

- Pay before printing
- Receive payment confirmation
- View transaction status
- Access order and payment history

8. Smart Queue Management

“If there two orders came. First is of 50 pages and second is 3 pages. Then 3 pages print should be processed first , to save time”

Instead of processing documents simply in the order they arrive, the system intelligently manages the printing queue.

The platform estimates factors such as:

- Number of pages
- Number of copies
- Current queue length
- Printer availability
- Estimated printing duration

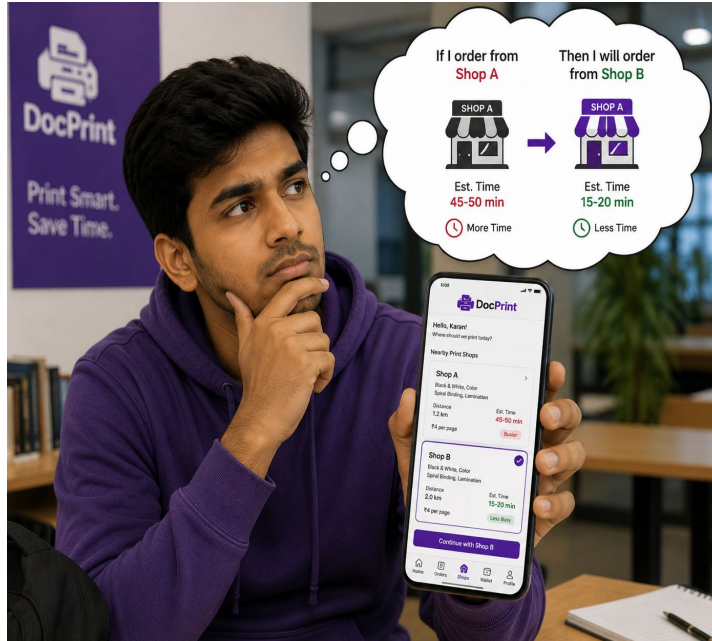

Benefits

- Reduces waiting time
- Improves printer utilization
- Prevents printer overload
- Provides more accurate completion estimates
- Reduces unnecessary crowd in front of shops

Based on these factors, the system calculates the most efficient order in which jobs should be processed.

9. Estimated Printing Time

- Users can see the estimated time in their app
- The estimation considers:
 - Current printing queue
 - Number of pages
- The estimate can dynamically update if the queue changes or printer availability changes.

10. Queue Prediction

Predicting Future Waiting Time

The system analyzes current printing activity to predict:

- Expected waiting time
- Busy periods
- Printer workload
- Potential delays

This helps users decide:

- Which printing center to select
- Whether to wait or choose another center
- When their document is likely to be ready

The platform can eventually use historical data and machine learning to improve prediction accuracy.

Printer Utilization

Overall Printer Usage Today

59%

Average Utilization

12. Intelligent Printing Price Estimation

Instead of using only a fixed price per page, the system can calculate an estimated printing cost based on document characteristics.

Possible factors include:

- Number of pages
- Color coverage
- Ink usage estimation
- Paper size
- Paper type
- Number of copies
- Printing method

For image-heavy documents, the system can estimate that higher ink consumption may increase the printing cost.

13. Automatic Printer Failure Detection & Smart Order Rerouting

Real-time monitoring • Instant alerts • Automatic rerouting or refund

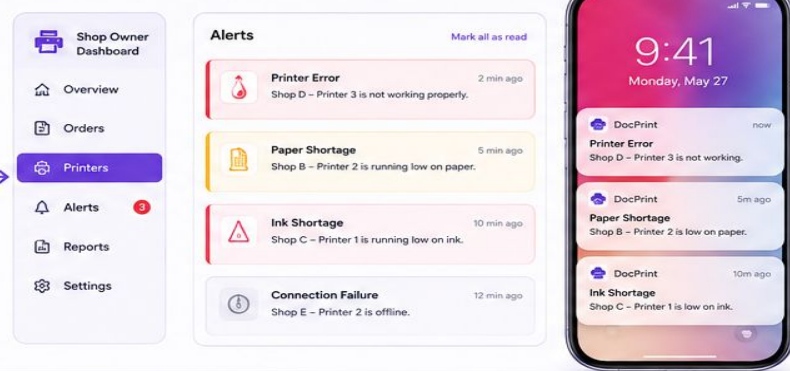

1. Printer Health Monitoring

The system continuously monitors the health of all connected printers.

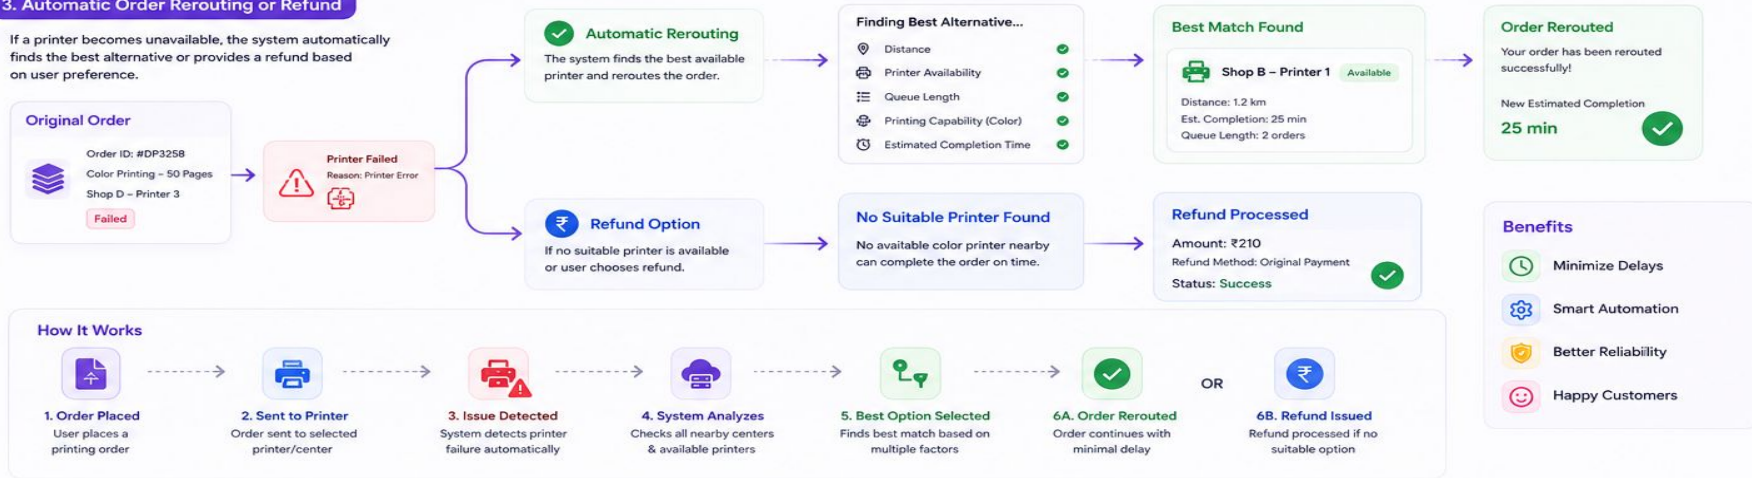

2. Instant Alerts

Shop owners and administrators receive real-time alerts.

3. Automatic Order Rerouting or Refund

If a printer becomes unavailable, the system automatically finds the best alternative or provides a refund based on user preference.

14. Smart Pickup & Delivery Experience

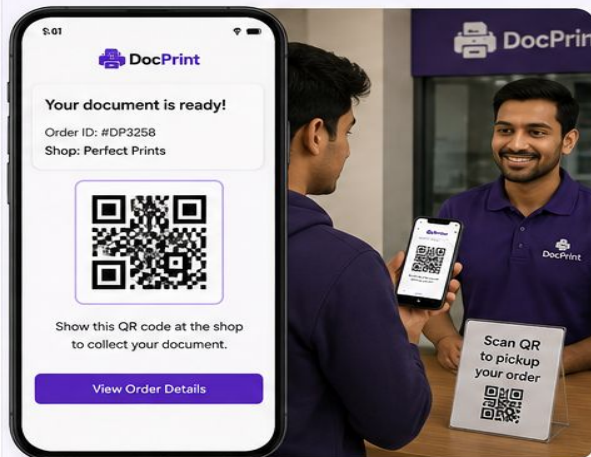

QR-Based Pickup

Choose what works best for you. Fast, secure and transparent.

Self Pickup

Get notified when the document is ready and collect it from the shop.

1. Get Notified

2. Show QR Code

3. Verify Order

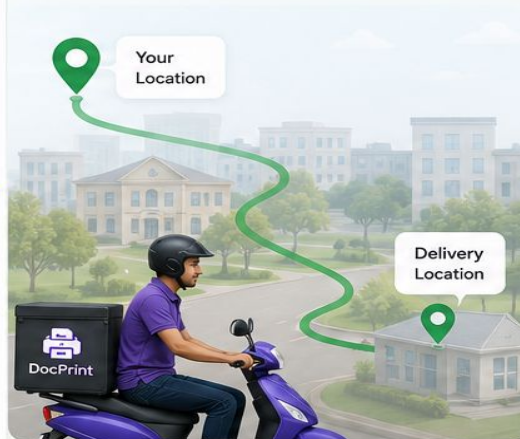

4. Collect Document

Delivery

Get documents delivered directly to hostels, academic buildings, libraries, or any requested location.

Hostels

Libraries

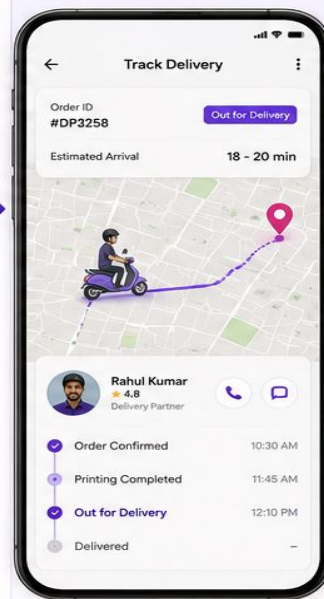

Any Location

Real-Time Delivery Tracking

Track your delivery in real-time for a transparent and reliable experience.

Live Delivery Status

Know exactly where your order is.

Delivery Partner Location

Track your delivery partner in real-time on the map.

Estimated Arrival Time

Get accurate ETA so you can plan your time better.

Faster Pickup

Secure & Contactless

Transparent Tracking

Better Experience

15. Privacy and Document Security

Your documents are safe with **DocPrint**

1. Upload Document

Student uploads document securely

2. Secure Transmission

Documents are encrypted during transmission

3. Secure Storage

Files are stored securely on encrypted servers

4. Authorized Access

Only authorized personnel can access documents

5. Print & Complete

Document is printed and order is completed

6. Automatic Deletion

Documents are automatically deleted after completion

End-to-End Security

From upload to deletion, your privacy is our priority.

Trusted & Secure

We follow industry best practices to keep your data safe.

Secure File Storage

Documents are stored in encrypted servers with multiple security layers.

Encryption in Transit

All documents are encrypted during transmission using industry-standard protocols.

Access Control

Role-based access ensures that only authorized staff can view documents.

Temporary Access

Documents are accessible only for the required time to complete the order.

Automatic Deletion

Documents are automatically deleted after completion to ensure maximum privacy.

Audit Logs

All activities are logged to monitor access and ensure full transparency.

Your Privacy. Our Priority.

We protect your documents like they're our own.
